

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Sixth Plymouth Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Sixth Plymouth Representative District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; less than one percent (442) of these admissions reside in the Sixth Plymouth Representative District.¹ **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Sixth Plymouth Representative District reported the following characteristics:

- 71% were male and 29% were female.
- 53% were between the ages of 21-39.
- 95% were white non-Latino, 1% were black non-Latino, 4% were Latino, and 2% were other racial categories.
- 57% were never married, 26% were married, and 17% reported not to be married now.
- 17% had less than high school education, 50% completed high school, and 33% had more than high school education.
- 50% were employed.
- 4% were homeless.
- 31% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Sixth Plymouth Representative District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	64%	22%	6%	3%	1%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

¹ To protect client confidentiality, statistics representing clients under 17 years of age have been omitted from this fact sheet.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2002							
Sixth Plymouth Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	277	249	76	54	33	17	15
FY '96	268	240	89	51	18	35	24
FY '97	332	301	84	73	33	45	35
FY '98	379	333	111	65	37	59	38
FY '99	421	364	108	80	31	69	43
FY '00	369	308	104	73	38	74	52
FY '01	394	334	98	70	22	72	45
FY '02	442	355	121	78	27	109	68
